

# JOINT TTS & ISODP MEMBERSHIP

Join both societies and get 50% off your TTS membership dues. A further discount is given to individuals from emerging economies.

## BENEFITS OF BEING A TTS & ISODP MEMBER

- Access to member-only sections of the TTS website [www.tts.org](http://www.tts.org)
- Free access to educational materials, including TTS Multimedia Library with oral presentations from past congresses and meetings, and webinars
- Free online access to TTS's official journal, *Transplantation*, with an electronic table of contents sent by email to each member
- A subscription to TTS Newsletter, *Tribune*, updating you on TTS and Section activities
- Awareness of global transplantation events including WHO, ONT and regional society activities
- Reduced registration fees at TTS symposia, congresses and meetings
- Access to grants, awards and proposed sponsored fellowships
- Participation in TTS Initiatives including:
  - TTS Education Academy
  - Declaration of Istanbul
  - nKOL activities
  - Women in Transplantation networking events
- Participate in voting on locations of future TTS Congresses and for TTS Officers and Councilors
- Entitlement to reduced congress registration fees.
- Access to the online ISODP directory
- Ability to participate in educational webinars
- Joint membership initiative with TTS: receive a 50% reduction on TTS dues when you pay your ISODP dues at the same time as TTS
- New membership rate for members from emerging economies. Save 50% off of your dues! Full Members from developed economies pay \$50, while emerging economies pay \$25
- Discounted journal prices for *Transplantation Proceedings*, *Transplantation Reviews*, *Immunology*, *Transplant Infectious Disease*, and *Xenotransplantation*
- Eligibility to apply for ISODP Scholarship Programs
- Voting and nomination rights for future ISODP Council elections and congress locations
- Access to multimedia content from past congresses and webinars.
- Free copies of TTS's Newsletter *Tribune* updating members on ISODP and TTS activities.

The  
**Transplantation**  
Society

International Society  
For Organ Donation  
and Procurement

## TTS VISION STATEMENT

The Transplantation Society will provide the focus for global leadership in transplantation:

- Development of the science and clinical practice
- Scientific communication
- Continuing education
- Guidance on the ethical practice

## TTS MEMBERSHIPS

- Full Membership
- Trainee Membership
- Associate Membership

## ISODP VISION STATEMENT

The mission of International Society for Organ Donation and Procurement (ISODP) is:

- To encourage the growth of transplantation globally
- To promote societal attitudes towards achieving self sufficiency in organ donation
- To foster better understanding of dynamics of donation, legislative mechanism, societal awareness through education and public awareness
- To fulfill its ideals by exchange of views and information by holding conferences across the world

## ISODP MEMBERSHIPS

- Full Membership

## HOW TO BECOME A MEMBER

Visit us online at [www.tts.org](http://www.tts.org) and complete the application form

**OR**

Fill out the form on the following page, sign the TTS Ethics Statment on the back, and return to:

**Alexandra Murphy**  
Membership Services Coordinator  
Tel: +1-514-874-1717 ext. 215  
Fax: +1-514-874-1716  
Email: [membership@tts.org](mailto:membership@tts.org)

# JOIN US TODAY!

*...and become part of two  
growing organizations  
focused on the entire global  
transplant community.*

YOU MAY ALSO APPLY DIRECTLY ONLINE AT [WWW.TTS.ORG](http://WWW.TTS.ORG)

**Ethics Committee of The Transplantation Society**

The Transplantation Society is the leading international society of physicians, surgeons and scientists involved in the transplantation of organs and tissues. The membership should be active in promoting organ donation from deceased as well as from live donors. The Society is proactive in the development of international transplant policy, the monitoring of transplantation activities and in supervision of the adherence to proper principles of practice.

It is a fundamental principle for The Transplantation Society that donors of organs and tissues are not exploited and that consent for donation must be obtained without coercion. The Transplantation Society opposes the buying and selling of organs

Two models of authorization for organ donation from the deceased donor, explicit consent or registered objection, are practiced. In countries using the system of registered objection, extensive efforts should be taken in order to ascertain that the public knows its right to object. Members of The Transplantation Society must not be involved in obtaining or transplanting organs from executed prisoners or other donors where there is a risk that an autonomous consent for donation is lacking.

The applicant for membership in The Transplantation Society should review the Policy and Ethics Statement at the following TTS website: <http://www.tts.org/policy>

Applicants for membership in The Transplantation Society should also be aware of the following positions of the Society:

1. All countries with donation and organ and tissue transplantation activities should have relevant legislation ensuring transparency, safety and effective monitoring of the procedures.
2. All countries should enact legislation prohibiting exploitation of donors by commercial trafficking in organs and tissues.
3. All countries should have a system for approval and certification of transplant centres and physicians by relevant government and/or medical professional authorities.
4. All countries should have methods for registration and tracking of all organ and tissue donors.
5. All countries should have systems to ensure that the allocation of organs is transparent and governed by medical criteria.
6. All countries obtaining organs from deceased individuals should legally define death and the criteria to diagnose death. The determination of death should be independent of a direct interest in a subsequent organ transplant procedure. No organs or tissues should be removed unless the individual is declared dead.

7. In the case of live donation, all countries should be guided by relevant legislation and monitoring to ensure that:
  - a) only individuals with the cognitive capacity to understand the risks and benefits of being a live donor are accepted as donors;
  - b) potential donors receive the relevant and sufficient information about the procedure to make an autonomous decision;
  - c) the decision to donate is voluntary, free of exploitation and coercion;
  - d) all donors receive a complete medical and psychosocial evaluation and are cared for throughout the postoperative recovery period;
  - e) donor's access to long-term follow-up is promoted.

Scientific studies and clinical activities should be performed in keeping with the ethical principles delineated in the following policy documents:

The Declaration of Istanbul on Organ Trafficking and Transplant Tourism Lancet. 2008 Jul 5;372 (9632):5-6.

For Live Kidney Donation - The Consensus Statement of the Amsterdam Forum (Transplantation 79(6): S53-S66, 2005)

For Live Donation of Extrarenal Organs - The Consensus Statement of the Vancouver Forum (Transplantation 81(4): 1373-1385, 2006)

For Studies of Xenotransplantation - The International Xenotransplantation Association Ethics Committee Position Paper on "The Ethics of Xenotransplantation" (Xenotransplantation 10:194-203, 2003)

For research involving human subjects -The Helsinki Declaration of The World Medical Association.

**I HEREBY ACCEPT TO PRACTICE ACCORDING TO THE POLICY AND ETHICS STATEMENT OF**

**THE TRANSPLANTATION SOCIETY (<http://www.tts.org>) AND THE POSITIONS OF THE TRANSPLANTATION SOCIETY STATED ABOVE.**
