National Transplant Coordinator Workshop

OBJECTIVES

The workshop is designed to provide

1. In-depth knowledge on pretransplant evaluation for living donors and potential recipients
2. Background knowledge on transplant immunology
3. Contra-indications to kidney transplantation
4. Psychosocial aspects of kidney transplantation
5. Post-transplant complications: Monitoring and management
6. Role of transplant coordinators
7. Transplant promotional activities in Malaysia

Message from Organising Chairperson

Malaysian Society of Transplantation has a role to facilitate and coordinate training and research activities in Malaysia. The last Transplant Coordinator Workshop conducted in 2019.

This workshop is focusing on various important areas of transplantation to provide up to date information for transplant coordinators as well as nephrology trainees focusing on pre-transplant counselling and evaluation process, basic immunology, psychosocial aspects, and long-term complications. This is important to ensure kidney transplantation is conducted with a highly professional and ethical standards. This workshop will also include many case-based discussions to expose transplant coordinators and nephrology trainees on problem solving approach.

I would like to take this opportunity to thank the organizing committee, the speakers, Ministry of Health Malaysia, Ministry of Education, and the secretariat who had supported and contributed to the success of this workshop
